

The Color of Innovation

- **Producing R-134a or other kinds of refrigerants?**
- **Need steel cans in a variety of sizes?**
- **Want high-quality, innovative products at competitive prices?**

Many companies make refrigerant cans, but only Sexton is the leader in DOT-approved can designs. With a wide range of sizes, including 3-inch and 211 x 604, Sexton makes it easy for you to stay competitive.

We also give you more choices for materials and packaging, 2-piece pistons instead of 3-piece cylinders, a wide range of dome/step designs, and optional DROC-bottoms. To match our flexibility, we offer the industry's best 8-color label printing, and we do it in-house to guarantee quick delivery.

If you're looking for an alternative to 38-45mm aluminum, or any other material you've been using, make Sexton your single source for refrigerant cans.

For a partner that specializes in original thinking, and puts those ideas to work for customers worldwide every day, get to know us.
