ITW SEXTON CHOOSES eSTYLE CAPS AS OVERCAP SOURCE FOR DOMED AEROSOL CONTAINER LINE

Decatur, AL, February 06, 2012 – ITW Sexton, a world leader in the production of specialty aerosol cans, has announced that eStyle Caps and Closures will produce single- and double-shell overcaps for its 211 diameter dome DoT 2P/2Q aerosol cans. They are used for a variety of products, including vehicle care, winter chemicals, and adhesives & sealants, as well as for many other industrial and consumer applications.

“We are proud to be associated with eStyle because of their quality and on-time delivery,” says Yurij Wowczuk, ITW Sexton’s general manager. “Regardless of a customer’s requirements, eStyle’s engineering excellence, production quality, and commitments to aesthetics and function help our customers obtain the packaging solutions they need to be successful.”

eStyle’s manufacturing process allows the company to produce aerosol caps in flexible quantities with numerous property combinations, depending upon the customer’s requirements. Cap materials include polyethylene (HDPE), polypropylene (PP), clarified polypropylene (CPP) and blended co-polymers.
